– Fast Gigabit Ethernet connection to network router
– Easy expansion- Two USB ports for additional hard drives

ORGANIZE, PERSONALIZE AND SAFELY SHARE YOUR DIGITAL LIFE

Fusing digital content and communication, Maxtor Fusion is a simple yet self-expressive way to safely share your digital life with your friends, family and colleagues.

Organize

Plug Maxtor Fusion into your network router and organize your entire household's photos, videos, music and documents easily with iconic buttons, thumbnails, tags, descriptors or folders. It's one simple interface for any type of your digital content! Whether you have two computers or five, all your family members can keep their files easily accessible in one central, safe location. With a whopping 500GB of capacity you can store your growing media collection —up to 384,000 photos or 36 hours of digital video or music. Any chance you'll reach that? Expansion is easy with two USB ports for additional external hard drives.

Personalize

Customize your content with a tailor made experience created just for your audience. Blend and assemble all different types of media such as photos, videos, and favorite songs around a theme or event like the family picnic or your band's debut performance.

Easily create unique combinations of your content from the same event for different people – in one easy step. Maxtor Fusion's web-based interface makes it easy!

Safely Share

Share your content privately, publicly, or even linked to your blog. Simply select the content you want to share, type in an email address, and Maxtor Fusion will email invitations to specified guests. Just one click in the invitation will take them to the digital experience you want to share with them. Or, you can create accounts for users with their own login and password.

Into blogging? You can microlink the files stored on Maxtor Fusion directly to your blog or webpage, and match the tags to those you already have on your blog! Maxtor Fusion's software generates the html coding to make linking easy.

Maxtor Fusion is designed with minimal exposure to the outside world so your content and security is protected. Password protection makes a safe environment for both private and public sharing.

Always on

Maxtor Fusion is always on, always available so you and your invited friends and colleagues have access anytime, from anywhere - No computer host needs to be powered on for guests to share. The web-based interface provides versatility with support for Windows, Mac and Linux operating systems.
