

# DJI FLY DRIVE

PORTABLE DRIVE FOR DRONE  
FOOTAGE

Data Sheet

## **Some shots you will, literally, never get a second chance at capturing.**

So when it comes to preserving jaw-dropping aerial footage, pros know that efficient, reliable, portable backup is crucial. That's why we partnered with DJI, the leader in drone technology, to bring you the Seagate® DJI Fly Drive. With 2TB of capacity, there's room for more than 60 hours of flights<sup>1</sup>—meaning you'll streamline the editing process by storing, consolidating and organizing all that footage in one reliable place.

## **Pack Less. Lose Less.**

With its integrated UHS-II MicroSD card slot and a reversible USB-C cable that tucks securely beneath the bumper, Fly Drive enables you to make fast in-field file transfers to the latest-generation computers without the need for multiple memory cards and card readers.

## **Work With Confidence.**

Fly Drive is enclosed within a durable bumper to help shield your footage from bags crammed with equipment, bumpy dirt roads, accidental drops—you get the idea.

## **Create Something Lasting.**

In the end, it's not about the drone, or the files, or your drive—it's about turning all of it into an experience that's uniquely yours, a perspective you can share with the world. That's why Fly Drive features a complimentary two-month membership to Adobe® Premiere® Pro CC, the industry's leading video editing software.<sup>2</sup>

<sup>1</sup> Based on DJI battery life of about 20 minutes, 1 hour of 4K 30fps compressed footage creates 30GB of data.

<sup>2</sup> Fly Drive offers complimentary two-month access to Adobe Premiere Pro CC, redeemable during product registration. Internet connection and Adobe ID required. Available only to users 13 and older. Not available in all countries. See [www.adobe.com/legal.html](http://www.adobe.com/legal.html) for applicable terms and privacy policy.
